(+62)85893191943 | Jakarta, Indonesia

A results-driven Informatics Engineering graduate with a strong foundation in software development, IT support, and data analytics. Experienced in building scalable web applications using Laravel and React, integrating AI models for intelligent systems, and managing backend API performance. Skilled in IT service management, troubleshooting, and server maintenance with hands-on exposure to Microsoft Active Directory and .NET environments. Passionate about leveraging technology to improve efficiency, user experience, and digital transformation within enterprise systems.

Education

Trisakti University

Aug 2021 - Jun 2025

Bachelor (S1) Teknik Informatika

- CGPA 3.76 out of 4.00
- Get Full Scholarship
- Participate in the HIBAH DIKTI Project & Faculty Project

Experiences

Systems Analyst Intern

Otoritas Jasa Keuangan DTPD

Nov 2025 – Present

- Analyze business and system requirements to support internal IT applications and reporting systems.
- Perform system testing, troubleshooting, and support to ensure application reliability and performance.
- Assist in data integration and automation of reporting processes to improve efficiency and accuracy.
- Collaborate with cross-functional teams to support ongoing system enhancements and IT initiatives.

IT Service Desk Intern

SD Guthrie Minamas Plantation

Aug 2025 - Nov 2025

- Provide technical support by analyzing and troubleshooting IT issues related to hardware, software, and network connectivity, including diagnosing application and server errors to ensure minimal downtime.
- Manage and resolve Microsoft Active Directory–related incidents, such as user account administration, access management, and policy enforcement to maintain system integrity and compliance.
- Collaborate with external vendors, including the Accenture team, to ensure timely and efficient resolution of IT infrastructure and security-related issues, coordinating root cause analysis when necessary.
- Assist in maintaining and enforcing IT security protocols, ensuring compliance with internal policies and standards.
- Support the troubleshooting and maintenance of backend API servers developed using .NET, as well as integration testing and issue resolution for Flutter-based applications connected to these APIs.

HaloSani Project

Full Stack Developer & AI Integration

Aug 2024 – Jun 2025

Trisakti University

- Developed a modular and responsive frontend using React.js with Tailwind CSS, focusing on accessibility and mobile-first design.
- Built a secure and scalable RESTful API using Laravel, supporting full CMS operations and JWT-based authentication.
- Managed project deployment on servers using DevOps practices.
- Designed and implemented OTP-based email authentication and password recovery via SMTP integration.
- Managed end-to-end integration of backend and frontend via Axios, ensuring fast and consistent data flow.
- Created reusable API endpoints for managing blogs, events, YouTube videos, eBooks, and feedback modules.
- Integrated YouTube API and built real-time community chat using Laravel broadcasting and third-party services.
- Engineered role-based dashboards for admins and users, enhancing content management efficiency.
- Integrated AI chatbot using Ollama NLP model with 88% intent recognition accuracy to support mental health discussions.
- Boosted user engagement by 30% through intuitive UI/UX design and interactive learning features.

IT Research and Development Intern

Software developer, intern
CNN Indonesia

Feb 2024 – Jun 2024

- Successfully developed a responsive and interactive admin interface for the Boutique Arsa website using the CodeIgniter framework, enhancing user experience and streamlining admin management processes.
- Optimized communication efficiency by implementing background processes for SMTP email and WhatsApp notifications using CT Corp's RESTful API, ensuring timely and reliable notifications.
- Designed and developed an admin interface using CodeIgniter for internal website content management.
- Engineered and deployed system architecture and server support for the RAKERNAS KEMENKES event, including a coupon lottery website built with CodeIgniter 3.
- Handled background processes for SMTP email and WhatsApp notification transactions using the CT Corp RESTful API concept.
- Developed the IQRA application according to user requests for additional features using the Ionic framework for application development.
- Created REST APIs for the CT ARSA event notification feature using the cloud messaging concept.
- Successfully deployed the IQRA application to the Google Play Store, managing updates, bug fixes, and maintenance to ensure consistent user satisfaction and app reliability.
- Played a key role as a system analyst & developer for the coupon lottery website at the RAKERNAS KEMENKES event, utilizing CodeIgniter 3, which contributed to the event's digital engagement and operational success.

Capstone Project Leader Data Analytics & Software Engineer

RevoU

Aug 2023 - Jan 2024

- Coobtaining analysis results from appropriate raw data so that insights and recommendations can be implemented.
- created a restful api program for post and get api so that it can be fetched on the front end usidinate the team regarding the requirements needed from the news portal, organize the web workflow and then distribute job desks to carry out the development process.
- deployment on the backend using railway and frontend using github.io so that the website becomes more effective in terms of upcoming news.
- RevoU Data AnalyticsCapstone Project Reduced 0.2% Hotel Cancellation Rate Over 6 Months. obtaining analysis results from appropriate raw data so that insights and recommendations can be implemented

Hibah DIKTI Project (Digital Handwritten Security System)

Software Developer, Freelance
Universitas Trisakti

Mar 2022 – Des 2022

- Developed an Android-based digital handwriting recognition system for identity verification.
- Implemented Support Vector Machine (SVM) for handwriting classification and feature selection using Fisher Score.
- Achieved best model accuracy of 56% through feature optimization and parameter tuning & Improved UI design and application responsiveness.

Skills

- **Soft Skills:** Teamwork, Leadership, Analytical Thinking, Adaptability, Public Speaking, Problem Solving, Remo: Teamwork, Analytical Skills.
- **Software:** Git, Vercel, Figma, Postman, Microsoft Office (Word, Excel, Power Point, Project), Netbeans IDI VSCode, Google Colab, Jupyter Notebook, Android Studio, Tableau, Figma, Visual Studio, Heidi sql, Filezil client, Postman, Docker, Kubernetes.
- **Web Programming :** HTML,CSS,PHP, Javascript, Python, Java,React.js, Next.js, JavaScript (ES6+), HTML CSS3, Laravel, Code Igniter.
- **AI Integration:** Natural Language Processing (NLP), Ollama Model
- **Android:** Java, Kotlin,Typescript, SCSS, Ionic Framework.
- **Database:** MySQL, MongoDB, POSTGRESQL, Apache Kafka.
- **Data analyst:** Python, R, Looker Studio.
- **Languages:** Bahasa Indonesia (Native), English (Fluent)
